

STREAMLINING IT PROCUREMENT: AUTOMATING STANDARD LAPTOP ORDERS WITH FLOW DESIGNER

PHASE 1: BRAINSTORMING & IDEATION

1.1 Brainstorming

Brainstorming

The project identifies the need to streamline standard laptop procurement by automating the configuration task after approval. The intended workflow reduces manual intervention and helps the hardware team receive configuration work promptly.

User Story

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for configuration. This is intended to ensure laptops are promptly configured upon arrival, reduce user wait times, and minimize manual intervention.

1.2 Problem Statement

Problem Statement

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Standard laptop requests may require configuration, and this step can be subject to oversight or delay, causing user frustration and inefficient resource allocation within the IT department.

1.3 Project Objectives

Objectives

The project objective is to implement an automated workflow using Flow Designer to facilitate procurement and configuration of standard laptops.

Key Objectives

- Create a seamless experience for users requesting standard laptops by ensuring timely configuration.

- Reduce manual intervention and potential errors in the procurement process.
- Improve resource utilization within the IT department by optimizing task allocation.
- Enhance overall efficiency and productivity in IT procurement operations.

1.4 Empathy Map

Empathy Map

The source document does not provide a formal Empathy Map Canvas. The supported user perspective is the IT procurement team, which needs a streamlined standard laptop ordering process, automatic task generation, and assignment to the hardware team.

User Need

The documented user story focuses on reducing user wait time and manual intervention while ensuring prompt laptop configuration.

1.5 Proposed Idea

Proposed Idea

Use ServiceNow Flow Designer to automatically create a Catalog Task after the service request reaches the approved state and assign the task to the Hardware assignment group. The Catalog Task should contain the short description and description 'Laptop need to Configured'.
